JOINT PRESS RELEASE

Berlin | April 25, 2019 | P112

DoorBird now integrates with Renz IP postbox systems for private homes and residential housing companies

Erwin Renz Metallwarenfabrik now manufactures customized postbox systems with integrated DoorBird IP door intercom modules. These individual solutions are ideal for private homes and residential housing companies.

The Renz myRENZbox intelligent postbox and parcel box system tackles the challenges of package delivery. The DoorBird IP video door intercoms, developed and manufactured by Bird Home Automation, send notifications to smart devices when the doorbell is pressed. Via the DoorBird app, the user can also speak to visitors and open the door. DoorBird IP video door intercoms can be integrated into various IP-based systems through a software interface (API) which is the key advantage in comparison to analog door intercoms.

About Bird Home Automation Group

The Bird Home Automation Group develops, produces and markets high-quality IP video door intercoms under the trademark "DoorBird" around the world. The company's headquarters and production plant are located in Berlin, Germany, with a further office in San Francisco, USA. "DoorBird" stands for the combination of exclusive design with the most innovative IP technology in the field of door communication. The products are made from corrosion-resistant precious metals and manufactured in Germany according to the highest quality standards. For more information, visit www.doorbird.com.
