PRESS RELEASE

Berlin / San Francisco | August 29, 2019 | P131

DoorBird Releases Indoor Station for IP Door Intercom

Bird Home Automation, a global leader in IP video intercom technology, has released the first indoor station for its DoorBird door intercom product line. The A1101 indoor station displays a live video feed from the DoorBird door station and provides 2-way audio communication with visitors. With a customizable high-resolution touchscreen display and hard keys for commonly used functions, the A1101 indoor station is intuitive and flexible.

With the release of the A1101, DoorBird can be a solution for all projects requiring a dedicated intercom endpoint. DoorBird now provides both the flexibility of an app-based video intercom system and the reliability of a wall-mounted station. The indoor station can be paired with all of DoorBird's single-family residence and multi-tenant models.

The A1101 can connect to the network via WiFi or a hardwired connection and can be powered via PoE. Settings are configured remotely via the DoorBird app. The indoor station communicates with the DoorBird intercom over the LAN and can provide the user door entry control and, in MDU projects, elevator control. There is no limit to how many indoor stations can be added to a DoorBird system. The A1101 has a sleek, low profile design. Like all DoorBird products, the indoor station is designed and built in Berlin, Germany.

The A1101 indoor station is now available worldwide. Bird Home Automation will present it at CEDIA Expo, the leading event in connected technology, which takes place from September 10-14, 2019 in Denver, Colorado.

About Bird Home Automation Group

The Bird Home Automation Group develops, produces and markets high-quality IP video door intercoms under the trademark "DoorBird" around the world. The company's headquarters and production plant are located in Berlin, Germany, with a further office in San Francisco, USA. "DoorBird" stands for the combination of exclusive design with the most innovative IP technology in the field of door communication. The products are made from corrosion-resistant precious metals and manufactured in Germany according to the highest quality standards. For more information, visit www.doorbird.com.
