**PRESS RELEASE**

Berlin | April 29, 2022 | P332

DoorBird at ISE in Barcelona

Bird Home Automation will exhibit its DoorBird IP video door stations and access control systems at Integrated Systems Europe (ISE) from May 10-13, 2022. The world's leading AV and systems integration exhibition takes place at Fira Barcelona where the Berlin-based manufacturer will present its product innovations at booth 2Q490.

DoorBird exhibits its product portfolio on 35 square meters of booth space and presents IP video intercoms for single-family homes and multi-tenant buildings, the IP video indoor station and compatible accessories. The door stations on display enable keyless access via RFID, keypad, fingerprint or the free DoorBird app. All IP products feature an open API interface for integration with third-party building and home automation systems.

Among the product innovations is a customized intercom system made of architectural bronze, which was created using the DoorBird 3D Configurator. This online tool enables the creation of custom-made IP video door stations for surface-, flush-mounting and retrofit installations in over 50 different materials and colors. Additionally, product dimensions, modules and functions can be customized during the configuration.

Further highlights at the DoorBird booth are the IP-based door stations with an integrated biometric fingerprint reader from Fingerprint Cards AB, a leading global biometrics company based in Sweden. Biometric access control via fingerprint is already available through the D21x series.

Particularly suitable for commercial spaces and apartment buildings are the door stations with integrated keypad and directory display, such as the D21DKV and D21DKH in vertical and horizontal form. Up to 200 PIN access codes can be managed and allocated to staff or residents per device.

About Bird Home Automation Group / DoorBird

The Bird Home Automation Group develops and manufactures high-quality IP video door intercoms and IP access control devices under the trademark "DoorBird" around the world. The company's headquarters and production plant are in Berlin, Germany, with a sales office in San Francisco (CA) and Jacksonville (FL). The products for connected smart home are made in Germany according to the highest quality and security standards and are used worldwide. "DoorBird" combines exclusive design with the innovative IP technology in the field of door communication. For more information, visit www.doorbird.com.
